# Senior Data Engineer

## **Description**

We are looking for a senior Data Engineer to join our Financial Data Services teams at NN to help us design, build, deploy and run the data solutions for Finance & Risk that will drive our Data Strategy.

#### What you are going to do

We are looking for a senior Data Engineer to join our Financial Data Services teams at NN to help us design, build, deploy and run the data solutions for Finance & Risk that will drive our Data Strategy. We have been working on implementing our Data Strategy in the last 5+ years. This is already paying off with the new future-proof data platforms that we now have in place. However, we need to accelerate our implementation and get ready for the next challenges: enabling AI, integrating data platforms with our legacy systems, provide data via self-service and redesigning our business processes to become data-driven.
