

Analytics Engineer (m/w/d)

Description

We are searching for an Analytics Engineer, who is as passionate about data as we are. You will work at the intersection of Analysts and Data Engineers, allowing you to learn from both and own data solutions from the technical foundation to the final product supporting the business. If that sounds like the right place for you, or a direction you want to go into, we would love to hear from you!

Tasks

- Collaborate with data analysts, data engineers, and business stakeholders to understand and solve data needs end to end
- Utilize dbt to manage workflow, perform transformations, and maintain data integrity across different stages of the data pipeline.
- Develop insightful dashboards and reports that drive strategic business decisions.
- Implement data quality checks (eg Great Expectations, dbt, or Python tests) and governance practices to maintain data integrity and compliance.
- Stay updated with industry trends and seek opportunities to improve data processes and solutions.
- Document data processes, models, and definitions clearly for team knowledge sharing and consistency.

Requirements

Minimum of 2 years of hands-on experience in data teams.

- Positive and solution-oriented mindset
- Strong technical foundation, including high proficiency with SQL, git, Python and dbt

Experience with data warehouses such as Postgresql, Google BigQuery and any leading data orchestration tool such as Airflow or dagster (which we use)

- Experience Data visualization and reporting tools such as metabase, PowerBI or Looker) and the ability to distill and present insides and not just numbers
- Excellent communication skills within the team and the ability to convey complex findings to non-technical stakeholders.
- You are fluent in German (C1+) AND highly proficient in English (B2+).
- You are located in Berlin, as the data team meets one day a week in the office.

Benefits

- **Driving change:** Our work contributes directly to the health of our customers. Together with your motivated team, you will make a significant contribution to making the everyday working lives of numerous employees healthier.
- **Health:** We live our product. YOUR health is also important to us. In

addition to 'active breaks' and other offers such as yoga in the lunch break, we therefore provide you with an annual budget for health courses and equipment.

- **Work-life balance:** A permanent employment contract, 30 days' holiday p.a.*, flexible working hours and the option to work from home give you the opportunity to strike a balance between your professional and private life.
- **Location:** If you don't want to work from home, you can expect a cool office in the centre of Berlin with a view of Museum Island and the opportunity to stroll through Hackescher Markt or Monbijoupark with nice colleagues during your lunch break. For your commute to work, we support you with a subsidised Deutschlandticket or the opportunity to lease a bicycle.
- **Team spirit:** we are characterised by our team spirit and our can-do mentality. Our passionate team is looking forward to meeting you. We strengthen our bond and cooperation through lively dialogue and regular team events.

**For a full-time position (40 hours/week, 5 days/week)*

How the process will look like

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you're part of making data play an even more important (and understood) part withing Brand New Day.
