

# Data Engineer

## Description

### Who We Are

At Kyndryl, we design, build, manage and modernize the mission-critical technology systems that the world depends on every day. So why work at Kyndryl? We are always moving forward – always pushing ourselves to go further in our efforts to build a more equitable, inclusive world for our employees, our customers and our communities.

### The Role

Join Kyndryl as a Data Engineer to be at the forefront of the data revolution, crafting and shaping data platforms that power our and our client organizations' success. This role is not just about code and databases; it's about transforming raw data into actionable insights that drive strategic decisions and innovation.

In this role, you will have the opportunity to design and develop data warehouse, data and reporting solutions for Samlink's client banks with your own team or in project specific teams. You co-operate with specialists from different banking areas internally and with clients. With a well-defined methodology, critical thinking, and a rich blend of domain expertise, consulting finesse, and software engineering prowess, you'll be the mastermind of data transformation.

Your journey begins by understanding project objectives and requirements from a business perspective, converting this knowledge into a data and reporting solutions. You are responsible for your own tasks and work estimates and it is important to manage one's own work. Armed with a keen eye for detail, you'll develop data and reporting solutions, ensuring they align with business and technical requirements.
