Data Science

Description

Hey, you on that side, can you believe that this ad appears on your screen by chance? Nimber doesn't believe in chance…

And now your spidey senses are tingling? Keep reading…

We are Nimber – we have entered the advanced technology consulting game. Our goal is to set new rules to put the world where it belongs, in people's hearts.

But what does Nimber mean? In mathematics and game theory, they are numbers with special properties of addition and multiplication. And what we really want is to add value to customers' projects.

Responsibilities:

- Data Analysis.
- Model building.
- Python code.

Requirements:

- Professional experience as Data Scientist.
- Degree in Software Engineering or Computer Engineering or similar.
- Experience with Python.
- Experience with SQL.
- Streamlit or PowerBI knowledge. **(Plus)**
- Experience with relational and NoSQL databases.
- Good written and verbal communication skills.
- Ability to work in a collaborative and productive environment.
- Critical analysis and problem-solving skills.
- Knowledge of Agile methodology, JIRA and Confluence. **(Plus)**
- Good level of English.

And what does Nimber expect from you?

- Be passionate about what you do.
- That you take the first step using the talent of Accelerated Innovation.
- That you define the right strategy with the gift of Sensitive Impartiality.
- That you decide to put into practice the privilege of Shielded Independence daily.

This is our infallible tactic to which we add the rules of the game at Nimber: impartiality, independence, and fairness. All that's missing is you!

Are you ready to win with us?

 If you are tired of feeling like just a number, send us your application and come be a Nimber.
