

Summer Internship Program – Machine Learning Engineer (Skopje, Bitola, Ohrid)

Description

Netcetera's 2024 Summer Internship Program is now open!

Build your skillset, boost your knowledge, and expand your horizons during your 2024 Summer Internship at Netcetera!

Get hands-on experience working on real, tangible projects using the latest technologies, all while being guided by a dedicated mentor and supported by expert colleagues.

We'll help you get started quickly through our onboarding program, support you with all the equipment, learning initiatives, and training, and keep your health, safety, and well-being as our top priorities, emphasized through our culture of caring, having fun, and exchanging knowledge.

The fun doesn't stop there – you'll experience Netcetera to the fullest through our inclusive and diverse culture and work environment, embracing the variety of disciplines, backgrounds, and lifestyles of all our employees. Take the initiative – apply for your internship with Netcetera!

Due to legal limitations, we are only able to offer internships to applicants who are below the age of 34.

Your Tasks

Learn all about a selected specialization:

- Gain expertise in a selected specialization through hands-on learning
- Develop, implement, assess, and enhance data-driven models using various machine learning techniques
- Utilize large language models (LLMs) to analyze and generate text-based solutions in your specialization
- Conduct thorough research in an area of interest and stay updated on emerging technologies, trends, and tools
- Perform ad-hoc analysis and present findings in a clear and concise manner
- Familiarize yourself with the assigned project ecosystem and its mission
- Actively participate in team coordination meetings and events

Requirements

Your Profile

As a computer science student, you excel in a team-oriented environment, possess strong communication skills, and demonstrate familiarity with or interest in the following areas:

Date posted

June 1, 2024

- Machine learning, reinforcement learning, computer vision, deep learning, and natural language processing
- Proficiency in applying probability and statistics concepts relevant to computer science, including hypothesis testing, regression analysis, and data analysis techniques
- Solid command of the Python programming language and associated libraries such as Scikit-Learn, Pandas, Pytorch, and NumPy
- Familiarity with the use of large language models (LLMs) for retrieval augmented generation (RAG) and appropriate libraries (LangChain, LlamaIndex)
- Advantageous to have general computer science and software development skills

This internship round will span a duration of three months, starting mid-July until mid-October with 100% working time. Within legal and company policies, Netceterians/you can choose whether to work remotely or from a Netcetera office and enjoy flexible working hours. This hybrid working model demonstrates our commitment to achieving the best suitable private and professional life balance.

This will be, of course, based on the interns' preferences, and agreed with their mentors.

Expected start: 15th of July

Valid until 21.06.2024
