

Principal Statistical Programmer

Description

Join our global team dedicated to innovation and initiative, where physical walls and different time zones don't limit, but encourage, collaboration. Where all contributions and new ideas are explored with an open mind and work is driven by our shared values: be courageous, be accountable, be honest, be inclusive and elevate others.

Job Description Summary

As Principal Statistical Programmer, you will hold a combined technical and leadership position within our global statistical programming department. You will lead statistical programming projects, provide support in managing and deploying resources effectively, and work alongside the Director of Statistical Programming to maintain effective programming departments at our various locations that are focused on delivering the highest quality of programming outputs and customer care.
