Junior Data Engineer – Data Platform

Description

Junior Data Engineer – Data Platform

Department: Data Services

Employment Type: Permanent – Full Time

Location: North West UK – Hybrid

Description

DescriptionWe are looking for a Junior Data Engineer to join our fast-paced Data Services area. Working with our Intermediate and Senior Data Engineers in the multi-functional, agile based squad you'll be developing, designing and supporting our new Data platform solution for a deployment in a cloud based environment. We have created an environment and culture of continual learning and we are looking for a Junior Data Engineer to join us who has enthusiasm to collaborate and learn.As a Data Engineer, you will have the opportunity to work in a fast-paced environment to continue to develop and support our new data platform solution. Working to a clear vision and roadmap you will be part of a growing team, working collaboratively designing and developing the solution. **About us:**CDL has established its position as a market leader in the highly competitive retail insurance sector by consistently creating powerful software solutions that deliver competitive and innovative advantage to our customers. We've custom-built our own modern, open offices set in our own landscaped campus in Stockport, employing over 600 staff.

Key Responsibilities

As part of the Data Services team, you will work on CDL's high performance business intelligence (BI) and management information solution that enables customers to derive powerful insight and value from the data that they hold. Built using cloud technology, currently AWS, it provides performance, scalability and flexibility.We have built a collaborative and creative culture where we employ agile techniques to deliver our pace-setting applications. We like to work in small, focused groups so you are always learning from people around you and you feel a part of the success of each project you are involved with.

Skills Knowledge and Expertise

- Knowledge of cloud technologies, AWS or similar.
- Knowledge of modern data tools (SQL, Python, GoLang)
- Knowledge of Spark – Pyspark
- Knowledge of Automation Tools (Terraform/Git/Gitlab pipelines/Jmeter)
- Knowledge of data formats like CSV, Fixed Format, JSON, Parquet, XML
- Analytical and problem-solving skills.

Diversity and inclusion
We're on a journey to keep innovating, that means welcoming new ideas and ways of thinking.

CDL recognises that building a diverse workforce is critical to the success of our business. We strongly encourage applications from a diverse talent pool and welcome the opportunity to discuss flexibility requirements and workplace adjustments with all our applicants.

How the process will look like

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you're part of making data play an even more important (and understood) part withing Brand New Day.
