

Data Engineer, Associate

Description

About this role

The Data Engineering team provides the data and platform for our Securities Lending Innovation, Data & Analytics team in Budapest, Hungary. Our responsibility is to ensure the operation of our data platform, availability and freshness of data, extending the scope with new subject areas, supervise and improve the accessibility of data. We champion a work environment where we enjoy freedom to supply ideas, make decisions and express diverse viewpoints.

- Develop and manage a sophisticated data platform that delivers reliable and outstanding data to a diverse range of users, including traders, client teams, and quant researchers.
- Collaborate with program managers, professionals from various disciplines, and data strategists in a multi-disciplinary team to expand the product offering based on business impact and demand.
- Understand, secure, improve existing and build new [ETL](#) & ELT data pipelines.
- Gain hands-on experience in building an ETL framework of next-generation technologies and solutions.

Required Experience:

- BSc or MSc in Economics, Computer Science, Mathematics or equivalent
- Minimum 4 years of meaningful work experience
- Strong skills in SQL and Sybase.
- Proficiency in Python and familiarity with dev ops tools like Azure DevOps.
- Understanding of data modelling, ETL/ELT framework design, and workflow orchestrations.
- Experience in data analysis, including profiling, validation, trend identification, and optimization techniques.
- Strong problem-solving and critical-thinking skills, with an ability to craft solutions and implement change.
- Meticulous attention to detail and analytical approach.
- Strive to work in a team

Desired Qualifications:

- Experience with Snowflake, SnowPipe, Snowpark, and ETL tools like Pentaho Data Integration or DBT.
- Workflow management tools such as Airflow.
- Familiarity with Aladdin, Linux, Business Objects, and Unix
