# Senior Consultant Data Analytics – DV Cleared

**Description**

## Company Description

At Turner & Townsend we're passionate about making the difference. That means delivering better outcomes for our clients, helping our people to realize their potential, and doing our part to create a prosperous society.
Every day we help our major global clients deliver ambitious and highly technical projects, in over 130 countries worldwide.
Our team is dynamic, innovative and client-focused, supported by an inclusive and fun company culture. Our clients value our proactive approach, depth of expertise, integrity and the quality we deliver. As a result our people get to enjoy working on some of the most exciting projects in the world.

**We are recruiting for a variety of skills and specialisms owing to an increase in work across our National Security accounts. A successful candidate must hold valid DV clearance through UKSV. Therefore, you would need to be a British National and hold a UK Passport. Your clearance status will be verified prior to interview.**

## Job Description

Due to growing demand for our Infrastructure Digital – Data and Analytics services, we are seeking to recruit DV cleared Consultants & Senior Consultants to drive data excellence with our team and clients. We are looking for a commercially and technically minded manager with a track record of delivering successful client engagements. An ability to manage relationships and give technical guidance across a multi-disciplinary team of data visualisation, automation, infrastructure and data science experts.

**The Role**

As part of the role you will:

- Have a very strong technical background interfacing with clients and technical teams

- Lead client engagements, delivery strategy and provide technical delivery and assurance of projects
- Design, develop and deliver data-driven solutions in collaboration with clients and other business units to drive insights and performance
- Produce design documents and technical specifications, including functional and non-functional requirements and end-to-end data processes
- Lead and contribute to business development activities and proposal writing
- Identify and establish new relationships, whilst maintaining and developing existing relationships

- Support the build and deployment of data systems and their data pipelines whilst being able to analyse and resolve data quality issues
- Provide support and collaboration in multidisciplinary delivery environments
