Data Engineer-ES-Madrid

Description

We are a digitally native company that helps organizations reinvent themselves and unleash their potential. Our innovative approach combines design, engineering, and scale to create cutting-edge solutions for our clients.

Right now, we are looking for a Data engineer to join our team!

You will get the chance to:

- Collaborate with cross-functional teams and present data-driven insights to stakeholders, aiding strategic decision-making.
- Conduct in-depth analyses and research, synthesizing findings to make impactful recommendations and document insights clearly for clients and internal teams.
- Raise and address alerts proactively, ensuring both internal teams and clients are well-informed and prepared to take action.
- Enhance your organizational and time management skills to meet project deadlines effectively while maintaining high-quality work.

What will help you succeed:

- Advanced English skills.
- Advanced level of Looker
- Intermediate level of PBI
- High knowledge of [ETL](#) processes
- Communication, collaboration, and data presentation skills
- Analytical mindset
- High capacity for analysis and research
- Raising alerts both internally and to the client
- High capacity for synthesis to make recommendations based on analysis

At Globant, we believe that an inclusive culture and a diverse environment makes us stronger. We are an equal opportunity employer (EOE M/F/D/V), always seeking to generate a place for inspiration and growth for everyone regardless of race, color, religion, national origin, sexual orientation, age, marital status, disability, gender identity, or veteran status.

If you want to know more about our benefits and perks [click here](#).

How the process will look like

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and
