

Technology Capability Team Leader – Payments Data Software Development

Description

Job ID: 23641

Would you like to lead a team of SW developers ? be our expert in development of our data applications/ pipelines in Payments Data domain ? We are now looking for an experienced SW developer with ambitions to take up a role as team leader for Payments Data SW developers team, developing and maintaining our data & analytical payment applications. The role is ~50% hands-on technical work (design + development) and ~50% leadership.

At Nordea, we know our customers' needs are changing – and we're deeply committed to meeting them with the financial solutions of tomorrow. We're creating an agile environment where we're harnessing the power of technology – one where you can make an impact. So bring your skills, ideas and unique background. With us, you'll find plenty of opportunities to grow and make your mark on something bigger.

About this opportunity

As Capability Team Leader for Payments Data Software Development, you'll play a valuable role in leading a team of developers and data analysts, internals as well as consultants. You will provide the strategic oversight, direction and deep technical understanding of how to modernize and develop our data pipelines – Batch (classic [ETL](#)/[ELT](#)) as well as streaming / event based (Kafka).

What you'll be doing:

- Managing a team of Developers and Data Analysts
- Be technical mentor and perform competence development and knowledge sharing within your capability – including hiring
- Deployment and use of relevant standards, frameworks and tools
- Hands-on design, development and implementation of our data and analytical payment solutions
- Identify and drive initiatives for capability uplift within Payments Data Engineering, including but not limited to competence development, knowledge sharing, deployment and use of relevant standards, frameworks and tools

The role is based in Copenhagen (Taastrup).

Collaboration. Ownership. Passion. Courage. These are the values that guide us in being at our best – and that we imagine you share with us.

To succeed in this role, we believe that you have:

- Strong communication skills to teach and convey messages in a professional manner
- Skills in coaching team members in the areas of performance, standards and work methods
- Ability to resolve conflicts (mediation skills)
- Ability to manage challenging conversations e.g. performance assessment

Your experience and background:

- Expert in Java and SQL
- Experience with Kafka distributed event store and stream-processing platform (as producer and consumer) as well as classic ETL/ELT and data modelling
- Proven work experience as a Senior Data Engineer, building and maintaining performant data pipelines, platforms and applications for reporting and analytics (cloud + on prem)
- Minimum 10 years of professional experience as Data/BI Architect, BI Specialist or Data Engineer (ideally a combination)
- Some team/technical leader experience
- Experience in large scale production environments and implementation of modern data architectures.
- Degree in computer science and engineering, mathematical modelling or similar.

If this sounds like you, get in touch!

Next steps

Submit your application no later than 05/06/2024. For more information, you're welcome to contact Troels Nissen, troels.nissen@nordea.com.

At Nordea, we know that an inclusive workplace is a sustainable workplace. We deeply believe that our diverse backgrounds, experiences, characteristics and traits make us better at serving customers and communities. So please come as you are.

Please be aware that any applications or CVs coming through email or direct messages will not be accepted or considered.

How the process will look like

Your teammates will gather all requirements within our organization. Then, once

priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you're part of making data play an even more important (and understood) part withing Brand New Day.
