

PowerBI Developer

Description

Job Description

You will build and support the US Data Visualization & Reporting capability as part of the US Data Strategy for the US Commercial Organization at Biogen. As part of the US Data team, you will enable the US Commercial digital and analytics strategies by developing data solutions that maximize the use of our data assets.

What you will do

- Collect requirements from the business.
- Design, develop and publish new reports and data models using Power BI based on customer requirements.
- Work on enhancements on the existing reports and data models.
- Support in translating complex data sets into actionable reporting frameworks and models to enable key performance indicator (KPI) visualization that supports high performance for end users.
- Develop tabular and multidimensional data models that are compatible with data warehouse standards.
- Responsible for designing and updating methodology and project documentation.
- Follows quality assurance and control processes, and performs routine data management tasks, such as data validation and correction to ensure data accuracy, integrity, and completeness.
- Ability to work as a member of a team or independently with minimal supervision, depending on the project.
- Perform training to other Power BI users, as needed.
- Perform other duties as assigned.

Qualifications

Who you are:

- 1,5+ years of experience working directly with Power BI; experience in developing, publishing and scheduling Power BI reports as per the business requirements.
- Experience working directly with Power BI (Cloud) is a strong advantage.
- Experience in end-to-end implementation of BI projects for developing a portfolio of scorecards, KPIs, reports & dashboards.
- Experience in optimizing dashboards with a focus on usability, performance, flexibility, and standardization.
- Experience with writing and debugging SQL queries.
- Knowledge of SQL queries is a must.
- Knowledge of SQL Server Reporting Services (SSRS) and SQL Server Integration Services (SSIS) – nice to have.
- Adobe Analytics knowledge – nice to have.
- Technical capabilities with MS Office, in particular Excel (including Pivot Tables, Charts, and vlookup/xlookup).

Additional Information

At our newly built, centrally located Warsaw office, our team supports a global organization with dedication and innovation. In this office, where 31 nationalities form our community, we celebrate the strength that comes from differences in backgrounds, experiences, and perspectives. This commitment to fostering a supportive and inclusive workplace has earned us a Great Place to Work Certificate for three consecutive years and Best Places to Work Awards in both Poland and Europe.

What drives us every day is our unique purpose, working passionately to change the lives of patients affected by rare neurological diseases. If our mission resonates with your heart and career aspirations, join our team.

We eagerly anticipate welcoming you to our dynamic and collaborative environment, where together, we make a meaningful impact on a global scale.

Why Biogen?

We are a global team with a commitment to excellence, and a pioneering spirit. As a mid-sized biotechnology company, we provide the stability and resources of a well-established business while fostering an environment where individual contributions make a significant impact. Our team encompasses some of the most talented and passionate achievers who have unparalleled opportunities for learning, growth, and expanding their skills. Above all, we work together to deliver life-changing medicines, with every role playing a vital part in our mission. Caring Deeply. Achieving Excellence. Changing Lives.

At Biogen, we are committed to building on our culture of inclusion and belonging that reflects the communities where we operate and the patients we serve. We know that diverse backgrounds, cultures, and perspectives make us a stronger and more innovative company, and we are focused on building teams where every employee feels empowered and inspired.
