

Data Analyst Internship

Description

Data Analyst Internship. Becoming the professional that you aspire to be

About the Internship

As a Data Analyst intern, you will have the exciting opportunity to collaborate closely with our dynamic teams and working on multiple tasks. You will play an important role in creating engaging and insightful data visualizations using Tableau, using advanced data analysis and modelling techniques to find valuable trends and patterns within our datasets. Your involvement in developing and maintaining data models, reports, and workflows will be crucial to our success. Furthermore, you will actively engage with various business units, gaining a deep understanding of their unique needs and creating customized dashboards and solutions to meet and exceed their expectations.

Key Responsibilities:

- Collaborate with the data solutions team to design, develop, and implement data-driven solutions
- Create interactive and insightful data visualizations using Tableau
- Write efficient and scalable Python scripts for data processing, analysis, and automation
- Work with JSON data structures for data interchange between systems and applications
- Perform data analysis and modeling to uncover trends, patterns, and insights
- Assist in the development and maintenance of data pipelines and workflows
- Discuss with business units (clients) to understand their needs and create dashboards tailored to their expectations
- Contribute to the documentation of processes, methodologies, and best practices
- Participate in team meetings, brainstorming sessions, and project planning activities

Our story

Curiosity

is one of the most helpful traits that will keep you sharp and optimistic. Always eager to learn something new. We stimulate that trait in every aspect of our daily work. Switzerland's leader in telecommunications, known as Swisscom, continues to invest in future talents. We believe that these future professionals help to shape our world and the way we do our business. As an ICT provider that offers many different products to our highly diversified customer base, IT is key to serving our B2C and B2B customers. Currently, we are active in three countries when it comes to IT: Switzerland, The Netherlands, and Latvia. Besides our homeland, Switzerland, our local DevOps Centres in Rotterdam and Riga help us to provide quality software to support all of our
