

Junior Product Analyst (Delivery Experience Data Team)

Description

Job Description

A hybrid work model requires 1-2 day/days a week in the office.

Are you an experienced professional with a passion for product analysis? Look no further! We're currently seeking a talented individual to join our team as a **Junior Product Analyst** at Allegro. In this role, you'll play a key role in shaping our Logistics Delivery products and driving strategies that resonate with our customers and merchants.

What will your work consist of?

- You will work with Product Managers, development and UX teams in the product development of one of Europe's largest ecommerce
- You will support the design and conduct of A/B tests with your statistical knowledge
- You will take an active role in generating hypotheses, deriving insights from data, generating recommendations based on data and creating product development strategies
- You will analyze large data sets in search of patterns and dependencies that affect key areas for the company
- You will have a real impact on the shape of Allegro

We are looking for people who

- have minimum of 1-2 year of experience in a Data Analyst / Product Analyst role or a similar capacity
- have proficiency in using SQL
- know how to build an insightful dashboard in BI Tools (e.g. Tableau or LookerStudio)
- have experience in processing data sets and presenting findings and recommendations
- have the ability to formulate hypotheses, design and conduct analyses
- have statistical knowledge to conduct A/B tests (experience in conducting experiments will be an advantage)
- are able to cooperate with many stakeholders, while developing effective and clear ways of communication
- know English at a minimum level of B2 (both speaking and writing)

What we offer

- Informal working atmosphere in a professional team – on board we have the best specialists and experts in their field
- A hybrid work model. We have well-located offices (with fully equipped kitchens and bicycle parking facilities) and excellent working tools,
- A rich package of benefits in the cafeteria system – you decide what you use (we can choose from medical, sports, lunch packages, insurance, shopping vouchers)

Employment Type

Full-time

Beginning of employment

asap

Job Location

Poznań, Poland

Working Hours

40

Base Salary

euro EUR 28K - 53K *

Date posted

June 4, 2024

- Annual bonus (depending on your annual assessment and the company's results)
- A 16" or 14" MacBook Pro, two monitors and all other gadgets that you should need
- English classes that we pay for related to the specific nature of your job
- Hackathons, team tourism, training budget and the internal MindUp platform

Why would you like to work with us?

- Big Data is reality for us (several petabytes of data)
- We can choose tools for analysis and reporting because we use innovative tools (Tableau, Looker Studio, GCP, Airflow)
- We have a real impact on the shape of Allegro – analyzes from analysts are a key element necessary in making product and business decisions
- We co-create the world of data – we work in technology, directly with development teams
- Work requires us to constantly acquire new competences and develop – thanks to which we constantly learn new technologies 🤖🤖
