Senior Data Analyst

Description

Are you passionate about data-driven decision-making and enjoy creating visually compelling stories? Groupon is seeking a skilled Senior Data Analyst with advanced visualization skills to join our team. This role is ideal for someone who has a knack for uncovering insights through data analysis and translating them into actionable recommendations.

 What is our mindset?

- We would compare ourselves to a sports team, where we strive to assemble the best team with the available resources.

- While maintaining values like fairness, mutual support, and respect, we also focus on performance, aiming to build a top-notch organization capable of delivering excellent results quickly. Our culture is built on courage, ambition, and is strongly meritocratic, allowing the most capable individuals to grow rapidly.

- Learn more about us on the landing page

 You'll be spending your time on the following:

- Develop a deep understanding of our consumers and merchants and how they interact with each other and with our product.

- Analyze complex data sets to identify trends, patterns, and insights.

- Develop and maintain reports, dashboards, and data visualizations to support business needs.

- Be a partner to business teams across the marketplace, helping them to better understand their performance through strategic analytics and structured thinking.

- Support our most strategic topics with deep-dive analytics, insights, recommendations.

- Empower the teams across Groupon Operations to answer data questions quickly and easily by building high-quality ground truth data sets, metrics and dashboards.

- Lead data-related projects from conception to completion, ensuring accuracy and timely delivery.

 We're excited about you if you have:

- At least 5 years of experience in data analytics and business intelligence or significant relevant experience.

- Proficiency in SQL. Experience in other data analysis tools such as Python, R or equivalent is a plus.

- Strong experience with Tableau visualization and data concepts.

- Excellent analytical and problem-solving skills.

- Strong communication skills with the ability to explain complex data concepts to non-technical stakeholders.

- Proven track record of working collaboratively in cross-functional teams.

We value Data analyst who are:

- A proactive approach, willing to take initiative and seek solutions.

- A quick starter and can run the tasks independently with minimal supervision and guidance.

- Adaptable to new tools, new business areas (e.g. marketing channels), and diverse team environment.

- Attention to detail, ensuring thoroughness in data interpretation.

- Balance between patience in long-term project results and urgency in short-term tasks.

- A preference for simplification, avoiding unnecessary complexities in tasks.

- A strong sense of ownership and responsibility in all undertakings.

We like to give a chance to someone who has a strong drive and is self-driven. Send us your CV.
