

AI Solutions Analyst

Description

Job Description –AI Solutions Analyst

hubb is a world leader in insurance. With operations in 54 countries and territories, Chubb provides commercial and personal property and casualty insurance, personal accident and supplemental health insurance, reinsurance and life insurance to a diverse group of clients. As an underwriting company, we assess, assume and manage risk with insight and discipline. We service and pay our claims fairly and promptly. The company is also defined by its extensive product and service offerings, broad distribution capabilities, exceptional financial strength and local operations globally. Parent company Chubb Limited is listed on the New York Stock Exchange (NYSE: CB) and is a component of the S&P 500 index. Chubb maintains executive offices in Zurich, New York, London, Paris and other locations, and employs approximately 40,000 people worldwide. Additional information can be found at: www.chubb.com.

This role will be to work as part of the AI Business Solutions group and join our fast-paced, high-energy team responsible for transforming the way Chubb operates globally and deliver meaningful business impact across the value chain.

This position offers the opportunity to leverage the entire spectrum of digital capabilities towards solving a wide variety of business problems as well as unique challenges in problem-solving. The focus is on applying a combination of industry-standard practices and innovative ideas to transform the way Chubb operates fundamentally.

Responsibilities

- Document and analyse as-is processes (functional specs and user stories), making recommendations for improvement by mapping to-be business processes that align to our future operating model
- Work within projects that drive organizational transformations for medium- and large-scale businesses
- Liaise between the client and a team consisting of SMEs, C-suite executives, Experience Designers, Product Managers, Consultant Developers and QA
- Coordinate and collaborate with all project stakeholders during workshops.
- Collaborate with teammates on the analysis and design of complex business applications using the latest technologies
- Create and review test cases, and coordinate with business stakeholders,
