

Business Analyst – SAP Logistics Execution in Amersfoort

Description

Within our partner's European headquarters in Amersfoort they develop, manufacture and support the implementation of advanced medical devices across Europe and the MENA region. Team members enjoy working in an environmentally friendly and international environment, in which people of diverse backgrounds are valued, challenged, and acknowledged.

If you are passionate about working in an organization that allows you to make decisions based upon what is right for the patient, customer, community and environment, then this might be the perfect opportunity for you.

As SAP LE Business Analyst, you will be responsible for business process design and configuration of relevant SAP Logistics Execution (LE-WM) processes. You will collaborate with SAP LE counterparts and stakeholders to ensure the successful implementation of projects and systems. The emphasis will be on the European requests and projects, but these can also be globally oriented. Daily work will include supporting the SAP Logistics Execution application and working on projects such as rollouts and implementation of new warehouse setup.

Responsibilities

- Supporting warehouse management team, to ensure business process design and relevant SAP LE configuration in line with the business needs.
- Developing design documents, functional specifications, test scripts, support data migration, assist in issue resolution, and risk mitigation for projects.
- Providing functional and technical knowledge to support development tasks SAP LE.
- Learn our business processes and facilitate software solution design.
- Ensuring software solutions are designed and developed to perform as intended and are implemented according to the project schedule
- Working closely with the US SAP team.

Qualifications

- Bachelors/HBO level education, preferably in Computer Science
- 4+ years of working experience in implementing and configuring SAP Logistics Execution (LE-WM)
- Good understanding of Warehouse Management (SAP WM) processes and SAP HU management and Transportation process
- Integration Knowledge with SAP SD, PP, and QM Areas
- Effective analytical and problem-solving skills
- Ability to manage multiple projects and collaborate with other team members

Job Benefits

- An international working environment, fueled by respect and a healthy work-life balance tailored to the business and team member's needs
- 27 paid vacation days (based on fulltime contract) with option to purchase five additional days
